

NU-WELL® 400 NON-IONIC SURFACTANT

APPLICATION

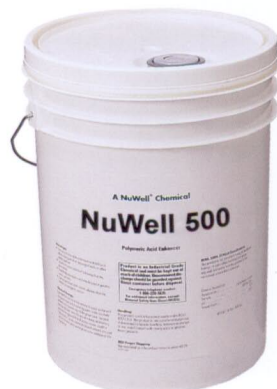

Nu-Well 400 non-ionic surfactant is capable of use over a wide pH range. The non-ionic nature ensures that the surfactant neither reacts directly nor interferes with any other chemical being used.

DESCRIPTION

- Surface-active properties are excellent for improving penetration of hard deposits or for wetting surfaces to be cleaned.
- May be used to improve flow characteristics of heavy fluid or muds used in well construction.
- By changing the surface tension, *Nu-Well* 400 improves clean up of oil or biologically fouled areas.

NU-WELL 500 CHLOROUT

APPLICATION

Nu-Well 500 chlorout is used on the surface, after the well or system discharge has been pumped into a tank or holding pond.

DESCRIPTION

- Used to neutralize chlorine solutions before their disposal
- Concentrated crystal that is easy to dissolve for fast neutralization
- Safe to handle
